amitkanswal7@gmail.com

www.linkedin.com/in/amit-kanswal-447558147

Dedicated software engineer with experience in developer platforms, specializing in Developer Experience (DevX) and front-end platform architecture. Pursuing a challenging role to leverage expertise in designing and scaling internal developer platforms that improve productivity, standardization, and deployment velocity.

PROFILE SUMMARY

- ❖ Possess **over 6 years** of rich experience in **software engineering**, with a focus on **platform engineering and developer experience** within the technology sector, displaying a strong commitment to excellence and innovation.
- ❖ Currently working as a **Senior Software Engineer** at **Contentstack**, developing **internal tooling, SDKs, and automation workflow** to streamline developer onboarding and delivery pipelines.
- ❖ Progressed through various roles throughout the career, gaining expertise in **micro-front-end architectures and back-end systems**, fostering a deep understanding of scalable application design and developer productivity enhancement.
- ❖ Founding engineer for the Developer Hub and Marketplace platform, **supporting 100K+ daily active users**.
- ❖ Improved **application startup performance from 13 seconds to 150 milliseconds** by optimizing shared dependency loading and host-level initialization.
- ❖ Skilled at **bridging front-end and platform engineering** to deliver cohesive, developer-friendly systems and frameworks.
- ❖ Strong advocate for **DevX best practices, including CI/CD optimization**, documentation, and self-service infrastructure.
- ❖ Displayed capability to **influence engineering standards, platform adoption, and cross-team alignment** in complex environments.
- ❖ Showcased **effective leadership and mentoring skills** by supporting **Junior Engineers** in navigating intricate projects and nurturing an environment of teamwork and ongoing enhancement within the engineering team.
- ❖ Proficient in **developing secure API proxy systems** that bolster the security and efficiency of external API access for marketplace applications, ultimately leading to improved reliability across the system.
- ❖ Exhibited a **deep comprehension of AI-assisted development** workflow, playing a pivotal role in converting internal documentation into formats suitable for AI consumption, thereby enhancing code generation and accelerating engineering productivity.

TIMELINE

B.E. in Electronics & Telecommunications,
Mumbai University, **2019**

Jan'20 – Present: Senior Software Engineer –
Developer Platforms / DevX at Contentstack

SOFT SKILLS

Team Leader
Communicator & Collaborator
Planner & Innovator
Decision-maker
Adaptable
Problem-solver

AWARDS & ACHIEVEMENTS

- ❖ **Runner-up, Contentstack Hackathon** (App SDK prototype later productized).
- ❖ **Above & Beyond Award (4 times)**, Contentstack.
- ❖ **Built secure API proxy, managing 10K+ daily calls** with validation and transformation.
- ❖ **Developed Chrome extension** for CMS navigation (**160+ daily active users**).

TECHNICAL SKILLS

- ❖ **Programming Languages:** TypeScript, JavaScript, CSS.
- ❖ **Front-end:** React, Next.js, Angular, Vue.js, Nuxt.js, Astro, Gatsby, Webpack (Module Federation).
- ❖ **Back-end:** Node.js, Express.js, NestJS.
- ❖ **DevOps & Infrastructure:** Docker, GitHub Actions, CI/CD, Vercel.
- ❖ **Testing:** Playwright.
- ❖ **Browser & Developer Tools:** Chrome Extensions, JSON Editor.
- ❖ **Integrations & Platforms:** YouTube API, Vimeo API, Cloudinary, Jira, Brightcove, Google Sheets.
- ❖ **AI & Internal Tooling:** MCP Tooling.

CORE COMPETENCIES

Platform Engineering	Software Development Life Cycle
Internal Developer Platforms (IDP)	User Experience Design
Agile/ Scrum Methodologies	System Architecture Design
Cloud Deployment Strategies	Continuous Integration and Deployment (CI/CD)
Performance Monitoring	SDK Development
API Design and Management	Technical Documentation
Code Review	Requirements Gathering and Analysis

ORGANIZATIONAL PROJECTS

- ❖ **Smart Work Tracker | Open Source Chrome Extension**
 - Built a Chrome extension for tracking work activity with reminders, structured logs, and data export for analysis.
- ❖ **AI & Developer Experience Initiatives**
 - Developed AI-driven tools and workflow to automate development, improve onboarding, and enhance code generation efficiency.

WORK EXPERIENCE

January 2020 – Present: Senior Software Engineer – Developer Platforms / DevX at Contentstack, Pune

Growth Path:

Key Result Areas:

- ❖ Defining SDK-based iframe–parent communication architecture, enabling scalable event management and lifecycle management for extensions.
- ❖ Leading cross-team architecture discussions, aligning on API contracts, validation frameworks, and failure management strategies.
- ❖ Developing and maintaining starter kits across React, Next.js, Angular, Vue, Nuxt, Astro, and Gatsby ecosystems.
- ❖ Building internal developer tools (JSON Editor, Dev Tools), improving debugging efficiency and developer productivity.
- ❖ Conducting technical sessions on React performance optimization, TypeScript best practices, and Playwright testing.
- ❖ Mentoring junior engineers, performing code reviews, and enforcing engineering standards across teams.
- ❖ Implementing multi-stack and field-level navigation workflow to streamline content editing.
- ❖ Defining and evolving platform governance models, including standards for code quality, security, and architectural consistency across teams.
- ❖ Establishing observability frameworks (logging, metrics, tracing) to ensure platform reliability and actionable insights into developer workflow.
- ❖ Driving platform performance optimization, including build times, bundle size reduction, and runtime efficiency improvements.
- ❖ Leading capacity planning and cost optimization initiatives for platform infrastructure and shared services.
- ❖ Designing and enforcing access control, authentication, and authorization mechanisms across platform services and integrations.
- ❖ Collaborating with SRE and infrastructure teams to improve platform resilience, incident response, and recovery strategies.
- ❖ Developing and maintaining versioning and release management strategies for platform components, SDKs, and shared libraries.
- ❖ Conducting platform usability research and gathering developer feedback to continuously refine platform capabilities.
- ❖ Aligning platform roadmap with business objectives by partnering with product, architecture, and leadership stakeholders.
- ❖ Supporting migration strategies from legacy systems to modern platform-based architectures with minimal disruption.

Highlights:

- ❖ Architected a micro-front-end platform using Webpack Module Federation, enabling independent deployments and team-level scalability.
- ❖ Owned end-to-end delivery of the **setData / setEntryData (beta)** feature:
 - Designed a postMessage-based communication protocol between iframe applications and the host UI.
 - Implemented dual-layer validation with hard schema enforcement and asynchronous soft validation via event-driven notifications.
 - Defined structured, field-level error contracts to enable precise debugging and developer feedback.
 - Built non-blocking error propagation mechanisms to ensure predictable and resilient system behavior.
- ❖ Designed and launched a Vercel-based integration platform, enabling one-click deployments using framework-specific starter templates.
- ❖ Delivered **20+ marketplace integrations** (e.g., YouTube, Vimeo, Cloudinary, Jira, Brightcove), enabling seamless third-party extensibility.
- ❖ Created **10+ framework integration** examples to accelerate onboarding and developer adoption.

EDUCATION

- ❖ **B.E. in Electronics & Telecommunications**, Mumbai University, **2019**

PERSONAL DETAILS

Date of Birth: 6th November 1996

Languages Known: English and Hindi

Address: Pune – 411047, Maharashtra
